XSales® SFA

Is a workforce automation solution focused on providing key tools & information for the control & monitoring of the entire sales process: order taking, billing, settlement, collection and delivery.

XSales® SFA is 100% configurable, ERP centric and brings all Business Rules to the hands of your sales reps, improving their overall performance before, during and after serving customers.

Key points:

1. **End-to-end Solution** for Pre-sales, Direct Sales and Delivery.
2. Full visibility & control over your Company's sales ecosystem (**including Third-party Distributors**)
3. On-site invoicing, truck inventory management and Delivery options (adjustments & proof of delivery)
4. Key industry features & top functionalities:
   - Company's inventory report
   - Suggested order
   - Sales history
   - Order status
   - Collection
   - DEX
   - Empties & Commercial Assets management
   - Surveys
   - Multimedia, docs printing & sharing
   - Performance reports **and more.**

XSales® maps

Is a mobile work force supervision platform that gives you total control over your field teams' activity.

It provides a visual GPS map representation of Transactions, Owners (transaction creators) and Point of Interests (POIs), transmitted by any (or multiple) data source(s).

Key points:

1. **Answers all questions** related to visit location & order execution (planned vs. real), geographic visibility, proximity to POIs and all transactions created in the field.
2. Actively traces mobile users activity through breadcrumbing (**even when not creating transactions**)
3. Allows data segmentation according to the Organizational Structure.
4. Alert Sytem, notifications and many other features to come in our road-map.

XSales® Consumer

Is an online self-service platform that allows Customers to place pre-sale orders directly from Suppliers.

After a simple registration request, Clients can access Suppliers' profile and from there, easily place orders directly from the app, at any time, from anywhere.

Key points:

1. **No face-to-face interaction required.** No Sales reps' visit needed.
2. Access to new sales segments & channels, greater exposure and broader geographic coverage.
3. **Mobile advertising** (m-Ads) available for customers targeting strategies.
4. Lowest flat rate: **1.25 USD per transaction** (not a percentage)
5. Minimum sales order amount & delivery date configuration.
6. Service costs reduction by customer segmentation.

XSales® Store

Is a business tool that allows the distribution of mobile applications and updates to all your Company's Android device users.

From the Administration Console, you can create and manage different groups according to their profiles and access levels for a smarter and segmented apps distribution.

Key points:

1. **One-click massive** app's upload & updates.
2. Helps the execution of controlled apps deploys.
3. Friendly, intuitive, simple **yet powerful.**
